PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience developing and modernizing enterprise applications using Angular, TypeScript, Java, Spring Boot, Microservices, REST APIs, PostgreSQL, and AWS. Expertise in Microfrontend Architecture, Module Federation, frontend performance optimization, accessibility, application security, CI/CD, and enterprise application modernization. Proven ability to take end-to-end frontend ownership, drive technical decisions, lead frontend teams, collaborate with Product and client stakeholders, translate business requirements into technical solutions, coordinate environment deployments and migrations, develop and integrate backend APIs, and deliver automation solutions that improve operational efficiency.

TECHNICAL SKILLS

Languages: Java 17, TypeScript, JavaScript, SQL, HTML5, CSS3

Frontend: Angular 18, RxJS, NgRx, Angular Elements, Web Components, Module Federation, Microfrontends

Backend: Spring Boot, Microservices, REST APIs, Swagger/OpenAPI

Cloud: AWS, Amazon S3, Amazon EC2, OpenSearch

Database: PostgreSQL

DevOps & Quality: GitHub Actions, Gradle, Artifactory, CI/CD, SonarQube, ESLint, Prettier, Unit Testing, Code Coverage

Security: SSO, Authentication, Authorization, HTTP Interceptors, Session Management, A11y/Accessibility

Engineering: Performance Optimization, System Design, Technical Documentation

PROFESSIONAL EXPERIENCE

Software Engineer II - Full Stack Engineer

December 2024 - Present

Alight Services India Pvt. Ltd. (Alight Solutions), Chennai, India

- Take end-to-end frontend ownership across enterprise applications, driving technical decisions, implementation strategy, task prioritization, problem-solving, code quality, and delivery.
- Lead and guide the frontend team on technical approach, implementation priorities, troubleshooting, decision-making, and successful delivery of features.
- Collaborate directly with Product and client stakeholders to clarify requirements, resolve functional and technical ambiguities, finalize scope, and translate business requirements into technical solutions.
- Develop enterprise applications using Angular, TypeScript, RxJS, Angular Signals, NgRx, Angular Elements, Web Components, and Module Federation.
- Contribute across the full stack through REST API integration, API payload modifications, new API development, and frontend/backend troubleshooting.
- Work with AWS S3, EC2, OpenSearch, Swagger/OpenAPI, CI/CD pipelines, and multi-environment deployments; coordinate with DRE teams for on-cycle and off-cycle migrations to higher environments.
- Drive engineering quality through A11y/accessibility, linting, SonarQube, and unit testing, achieving 100% unit test coverage across delivered projects.

Java Full Stack Developer

August 2023 - November 2024

Akiko Sherman Infotech Pvt. Ltd., Chennai, India

- Developed enterprise applications using Java, Spring Boot, Angular, JavaScript, PostgreSQL, REST APIs, and Microservices.
- Developed and integrated RESTful APIs and contributed to frontend and backend application functionality.
- Collaborated with clients to gather requirements, provide project updates, troubleshoot issues, and deliver enhancements.
- Conducted code reviews and contributed to application quality, maintainability, and technical documentation.

Java Developer

March 2022 - August 2023

SISL Infotech Pvt. Ltd., Chennai, India

- Developed web applications using Java, HTML, JavaScript, jQuery, PostgreSQL, and REST APIs.

- Developed backend services and integrated REST APIs to support frontend functionality and business requirements.
- Troubleshoot application defects, prepared technical documentation, and participated in client requirement discussions.
- Supported onboarding and knowledge sharing for new team members.

KEY PROJECTS

Customer Care - Enterprise Application

Alight Solutions

- Took complete frontend ownership of a customer care application built from scratch, covering requirement clarification, technical decisions, development, quality, deployment, and successful delivery.
- Worked directly with Product and client stakeholders to clarify requirements, resolve ambiguities, freeze scope, and ensure the delivered solution met business expectations.
- Led frontend development using Angular 18, RxJS, Angular Signals, Angular Elements, Module Federation, lazy loading, facade-based architecture, and REST API integrations.
- Worked across frontend, backend API integration, AWS services, OpenSearch, Swagger/OpenAPI, CI/CD, environment migration, testing, and technical handoff documentation.
- Led A11y/accessibility, linting, SonarQube, and unit testing improvements across the project.

Control Center - Enterprise Platform Modernization

Alight Solutions

- Enhanced an existing enterprise platform through UI redesign, UX improvements, performance optimization, and implementation of new requirements from the Product team.
- Took senior-level frontend ownership for technical decisions, implementation planning, problem-solving, task prioritization, and delivery using Angular, RxJS, NgRx, Module Federation, and Web Components.
- Improved frontend performance through lazy loading, virtual scrolling, shared observables, targeted reloads, and reduction of redundant API calls.
- Worked on microfrontend routing, SSO, session management, feature flags, analytics, and secure external tool navigation.

Tool Utility - Client Operations Automation

Alight Solutions

- Identified repetitive client-operation activities and took initiative to automate manual processes through a centralized Angular 18 microfrontend solution.
- Developed functionality for centralized tool registration, update, cloning, and management across multiple enterprise environments.
- Replaced repetitive manual operational activities with a guided and validated self-service workflow, improving operational efficiency and reducing client effort.
- Successfully delivered the solution to the client, received client appreciation, and earned recognition from leadership for the automation initiative and business impact.

Tamilnilam Land Records Web Application *SISL Infotech Pvt. Ltd. & Akiko Sherman Infotech Pvt. Ltd.*

- Developed and enhanced a land-record management application using Java, Angular, Spring Boot, JavaScript, jQuery, PostgreSQL, and REST APIs.
- Transitioned frontend functionality from JavaScript/jQuery to Angular to improve maintainability, responsiveness, and user experience.

EDUCATION

Bachelor of Computer Science, Anna University

2017 - 2021

CERTIFICATIONS

AWS Certified Cloud Practitioner

AI / Generative AI Course - In Progress
